## Statesman Relaxes

Rt. Hon. Winston Churchill, Chancellor of the Exchequer in the Baldwin administration, caught by the photographer in a moment of relaxation at the Banff Springs Hotel in the Canadian Rockies dur-

ing his recent tour of the Dominion. He was accompanied on his tour by his son, Randolph; his nephew, John, and his brother, Major Churchill.

## New Red Cross Hospital Opened in Calgary

Entering on a new period of development, the Red Cross has opened its fine new Crippled Children's Hospital in the City of Calgary. After seven years in rented quarters the Society have managed to obtain a building of their own, far more suitable for the work, and this building was opened at an interesting ceremony at which hundreds of Calgary's citizens, in addition to members from outside points, were present.

Hon. R. B. Bennett, a life-long friend of Red Cross and one who is especially proud of the achievements in the work of aiding the crippled child, was one of the speakers of the afternoon. Mayor Osborne in a short address congratulated the Society, bringing Red Cross to such a point of progress in Alberta and commended the peacetime programme to the generosity of the public. After dedicatory prayer by the Right Rev. Bishop Sherman, Mayor Osborne handed the key to the building, and in the absence of Mr. Patrick Burns, who had been called out of the city at the last minute, open the door and declared the hospital officially opened.

The new hospital is capable of caring for forty little patients, an increase of eight over the previous building, and is fitted to capacity.

Set in an acre and a half of ground the large red brick building has a splendid situation, on the heights of Mount Royal, where it commands a wonderful view of the city and surroundings.

Trees and lawns make a charming setting for the sick children who are able to appreciate the beauty of their home on the hill to a greater degree than others.

Our Clock Expert will be at  
**MacArthur's Store**

**Mon.-Tues., Oct. 14-15**  
Bring in your Watches and Clocks needing Repairs.

All Clocks will be repaired on the premises and delivered.

JEWELLER, ALSASK

## The Bellamy Trial

"The Bellamy Trial" will be shown in Oyen Theatre next Monday and Tuesday, under the auspices of Oyen Ladies' Aid. The picture is based on the book by Frances Noyes Hart, and is considered one of the most absorbing and novel mystery films ever screened.

A beautiful society matron is found dead in a deserted cottage on a Long Island estate. The designs of the law snare her husband, a former sweetheart and a rival in love. They are brought to trial, and the court room scenes provide the most absorbing of human dramas. Beatrice Joy and Betty Bronson head a big collection of stellar players.

## PRIZES AND AWARDS AT OYEN SCHOOL FAIR

Diplomas and scholarships were awarded at Oyen School Fair as follows:

Wayside, 55 points; Francis White, Oyen, 51 points; Clara Watrin, Superior, 38 points; Jean Lees, Oyen, 37 points; Vera Koronienko, Oyen, 35 points; Beth Whitlock, Oyen, 33 points; Edith Jackson, Glenada, 31 points. Boys: Fred Hatch, Oyen, 29 points; Bert Cornell, Wayside, 28 points; Walter Moore, Wayside, 28 points; and Ernest Warwick, Fairview, 24 points.

The newly decorated wards are one and all airy and spacious. They are tinted in soft light shades and with the spotless cleanliness for which all hospitals are noted, they present an inviting picture.

Boys and girls and babies are the members of this happy family of children, and to the onlooker there is a great deal of pathos in their appearance as they lie in bed in splints or casts or other hospital appliances. Wonderful stories of the successful cures are told by nurses who take a real pride in the little people under their care.

A gymnasium splendidly equipped assists in the re-education of their muscles helping in the task of straightening out little limbs. A day school is held by a certified teacher who, besides giving the regular academic instruction, also teaches handicraft, specializing in the art of flower making in which the children have become famous.

The Red Cross Society is to be congratulated on this big step forward, and it is hoped that the people of the province will give that additional support which will be necessary to maintain the work at this new standard.

## Again Supreme in Values

Featuring new showing of Ladies new Fall Dresses, supreme in style, fit and finish. These garments are different from the others. Comparisons may be adions, but we would invite you to see these Dresses as a means of gauging the true value.

Ladies all wool Flannel Dresses, prettily trimmed, from \$5.00 up.

## Canadian Anomalies

Following the close of the Great War by the signing of the Armistice, Canada demanded and was accorded a place of equality with other nations of the world at the Peace Conference, and, with the creation of the League of Nations, Canada entered that League on exactly the same terms as all other nations. That is to say, Canada was recognized as a nation. And in signing the League Covenant, Canada accepted the responsibilities of a nation.

At the last Imperial Conference, in London, with all the self-governing Dominions of the Empire and the British Government fully represented, a formal declaration was adopted setting forth that Canada and the other self-governing Dominions were fully autonomous nations within the British Commonwealth of Nations, possessing equal equality with Great Britain.

As a logical outcome of these declarations, Canada has established her own legations in certain foreign countries, appointed her own ministers, and, in turn, these countries have named ministers at Ottawa. Thus, as a nation, Canada has direct representation at Washington, Paris and Tokio, in exactly the same manner as any other country. Equally significant is the fact that the British Government has appointed a High Commissioner to Canada, while Canada maintains a High Commissioner in London.

But while Canada is thus recognized as a nation, it is the only nation in the whole world which has no nationality of its own, and no distinctive flag of its own. These are anomalies which other people find it extremely difficult to understand.

In England, people born in that country are recognized and officially listed as English; if born in France, they are listed as Scottish; in Ireland, as Irish; in America, as French; in Germany, as German; in the United States, as American. Born in Canada, on the other hand, a person may be listed as of any nationality under the sun except Canadian. Officially, there is no such person as a Canadian.

The writer of this article was born in Canada as were his father and mother. His mother's parents were both born in Canada. His father's parents were born in Ireland, their ancestors having crossed to the Emerald Isle from Scotland. So the writer becomes, in Canada, an Irishman, although neither he nor his parents ever saw Ireland. If his grandfather had been born in Spain, then the writer would be a Spaniard.

In the face of such an anomaly, such a ghastly absurdity, it is little wonder that the people of other countries laugh in the face of any person born in Canada who is bold enough to lay claim to his country being a nation.

Every nation in the world, except one, has a distinctive flag of its own. The exception is Canada. Australia, New Zealand, South Africa, Newfoundland, the Irish Free State all have their distinctive national flags, as well as the Union Jack, the flag of all of Great Britain and the Empire. Canada has a distinctive flag for its merchant marine, and by Orders-in-Council it has been decreed that this shipping flag shall be flown under Canadian Government buildings in the British Isles, and in foreign lands, but it is not officially recognized anywhere else.

Thus, while a Canadian may fly a distinctive Canadian flag over a ship owned by him, he may not fly it over his office building or his residence, and while such a flag may be flown over a Canadian Government building in London, Washington, Paris, or Tokio, it cannot be flown over a Canadian Government building in Halifax or Vancouver, or anywhere between these two points.

A person born in Canada is, therefore, that peculiar individual among the peoples of the world who has no nationality he can call his own, and no distinctive flag that he can properly fly in his own land and over his own home and public institutions.

And yet the people of Canada find pride in calling Canada a nation. Why, this so-called nation of Canada has not even the right to amend its own constitution, a power possessed by other self-governing dominions of the British Commonwealth.

Canada is, and is proud to be, and desires to remain, a part of the British Commonwealth of Nations. It is proud of and loyal to the Union Jack as the flag of that great Commonwealth, and will ever retain it. But just as the Dominion has its own coat of arms, so the Province has its Arms, and each city its Arms, so do the people of Canada desire to establish and retain their own nationality, have their own distinctive flag, and enjoy full autonomy in their domestic affairs.

Much as a native born Canadian may love England, or Scotland, or Australia, or New Zealand, he does not desire to merge his identity or lose his individuality. He is a Canadian and desires to be known as such, not as an Englishman, a Scotman, an Australian or a New Zealander.

If Canada is a nation, let it display the qualities and the insignia of a nation.

### Student Aviator Gets Thrill

**Fell Out Of Plane But Fortunately Had Parachute**

Arthur Carter, automobile dealer and student aviator, of Springfield, Mass., experienced an unexpected thrill when he fell out of his plane while flying 1,800 feet over Springfield airport.

Carter, who was flying without a safety belt, but who had a parachute, pulled the cord of his parachute and made a landing unhurt. The plane fell in an open field and was demolished.

School Teacher: "If a farmer has 14,000 pecks of potatoes, and he sells them for 20 cents a peck, what will he get?"

Small Boy: "A set of golf clubs, a radio and a town car."

### Rheumatism

Massage the aching parts with Minard's Soothing relief salve.

**MINARD'S**  
"KING OF PAIN"  
ANALGESIC  
PAIN EXPELLER

### Reconstructing a Liner

**Timber From Many Countries Used On Palatial Steamer**

Timber of many forests in many countries has been used for reconstruction and redecoration during the seven weeks' overhaul of the White Star liner "Majestic," which recently left Southampton for New York, on her one hundredth round crossing. The varieties of wood included oak, mahogany, teak, beech, ash, sassafras, walnut, Oregon yellow and pitch pine, deal.

Forty-four tons of paint was used on interior and exterior work, whilst 18,000 yards of electric wire was used in wiring electric bells and electric lights in cabins of tourist third cabin accommodation.

### Women Are Excluded

By the irascible rule of a woman, no woman has ever entered the gigantic Krupp plant, except the former kaiserin. The regulation was issued by Frau Margarete Krupp, for years chief director, and continued in force by her daughter, the present owner, Frau Bertha Krupp Von Bodeln and Halbach.

Five hundred years before the birth of Christ, Hippocrates, a Greek, wrote a book on medical science which is still studied by students in America and Europe.

### All Weather Road Promised

**From International Boundary To Prince Albert National Park**

An all-weather highway from Regina of the boundary to Prince Albert National Park will probably be put into condition, P. H. Macdonald, of the Saskatchewan Conservative Association, told members of the Kiwanis Club at Prince Albert. He thought that this should be the policy of the government, and the fact that a cabinet minister in the Anderson Government, Hon. J. A. Merkle, was on a trip to the park was evidence of the government's interest.

### HEALTH REGAINED

**Mother and Daughters Restored Through the Use of Dr. Williams' Pink Pills**

"Contrary to what my friends once thought, I am still living," says Mrs. Norman White of Canada. "I was ill and I give the credit to Dr. Williams' Pink Pills. I had been suffering for some years. I was weak and run down, my blood was so poor that I suffered violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did not benefit me. A second doctor told me to take no more pills, saying that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. It was like grasping at a straw, but six boxes of this medicine were given to me, and by the time I had finished I was able to sit up. Another six boxes were given and I was able to go about my household steadily improving. I continued the use of the pills, and as I felt my health fully restored. I still take the pills occasionally, but I feel strong and healthy. My daughters have also used the pills with the most excellent results. They are entering womanhood, and the use of this medicine both fully restored their health and vigor. You can see, therefore, that it is impossible for me to praise Dr. Williams' Pink Pills too highly, and I hope every weak person who may read this will benefit by my experience."

You can get these pills from any medical dealer, or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

### Escape From Submarine

**Men Leave Submerged Craft In Record Time During Experiment**

Ten men emerged from the submarine T-17 in forty-eight seconds during a submarine experiment today, making what is called a world record for such a feat.

Half of the participants used hand pieces, while the others were not specially equipped. The submarine carried a new device consisting of a large bowl beneath a torpedo tube permitting the men to leave the submarine without water entering the hull.

**A Household Medicine.**—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil for treatment of rheumatism, know that it will be without it in the house. It is truly a household medicine and it is effective in dealing with many ordinary complaints; it is an inexpensive medicine, keep it at hand, as the call for it may come most unexpectedly.

### What's In A Name?

An Englishman's home is his castle, but whether he is able to call his castle what he likes is a matter of some doubt. The thought arises because the Bank of England, once has decreed that the words "Bank of England" on a building is Burnley must be removed. The words, carved in bold letters in stone, have adorned this building for over a hundred years. Why they are there on one knows.

### Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Latent, Sask., writes:—"For over a month, last summer, my little boy was suffering from summer complaint. He had been there to be traces of blood in his stool, and anything else he would not say on his stomach very long. He became so weak he could not stand. A neighbor recommended

"Discouraged and in despair I read in a bottle, not expecting any more benefit than from the many other medicines I had tried. To my surprise I noticed a change in him after he had taken a few doses, and before the bottle was half used he was the same happy, healthy boy he was before he took sick."

Put fully by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1508

### Wheat Grading High

**Quality Year In Wheat Production In Saskatchewan**

This year is a quality year in wheat production in Saskatchewan. Seventeen cars of No. 1 hard wheat have already been received by the flour mills at Saskatoon in each of the years, 1927 and 1928, there was just one car of No. 1 hard wheat produced in western Canada.

The wheat graded by the Dominion grain inspector at Saskatoon up to the present time shows a very high proportion of the high grades, as follows:

No. 1 hard, 6 per cent; No. 1 soft, 51 per cent; No. 2, 39 per cent; No. 3, 4 per cent.

A part of the No. 2 is garnet wheat to which the No. 1 grade is not given.

At the Moose Jaw inspection point 50 per cent of the wheat is No. 1, 35 per cent No. 2, and the balance mostly No. 3. A. A. McPherson, of the Dominion seed branch, reports.

This year northern Saskatchewan has had a record wheat of equal quality to that grown in the southern part of the province. This is held to be unusual as excess moisture during the growing season in most years makes the northern wheat starchy. The Elrose line is producing a high percentage of No. 1 hard, Houghton and Elrose have outstanding shipping points.

### Interested In Peace Garden

**Financial Support Promised By Industrial Concerns In U.S.**

Interest is developing in a proposal of horticulturists of Canada and the United States that an International Peace Garden be established at some point along the boundary between the two countries. The idea has brought expressions of approval with the Governor-General of Canada and Hon. W. L. Mackenzie King, the United States ambassador to the Dominion, as well as from several western Canadian cities. The heads of many large industrial concerns on both sides of the boundary have promised financial support, and a considerable sum is now being raised for the purpose. The garden is to be a nucleus of enlightenment for the people of the two countries.

It is that a garden of the sort proposed would be a beautiful and fragrant memorial to the well known history of peace between Canada and her neighbor, and also an impressive pledge of good will. Its spiritual value at all times would depend upon the degree to which it was a symbol of cordial feelings actually entertained by the people of the two countries. It would be another and as regards to practice by them.—*Canadian Daily Post.*

### Roumanian Scientist

**Designs "Space Rocket"**

**Hopes To Carry Mail To America In Thirty Minutes**

A "space rocket," designed to shoot upward for 32 miles, and, it is hoped, be the forerunner of a rocket that will carry mail to America in 30 minutes, is to be built at once, it has been learned.

Prof. Hermann Oberth, a Roumanian scientist, designed the rocket. It will be built under the supervision of the U.P.A. Film Company. Its object, for the first night, is to measure the physical and chemical properties of the atmosphere. Instruments will be enclosed in it to this end.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

### Winnipeg Has Record

**Aviation Club Has Record Of Over Thousand Hours In Air**

The rapid growth of air-mindedness in Canada is indicated by the fact that members of clubs in Canada have flown more than 10,000 hours during the first eight and a half months of the year.

The Winnipeg club heads the list with well over 1,000 hours in the air. Toronto comes second with about 1,000 hours, and Ottawa third with just over 900 hours.

One hundred and ninety-two new pilots, and 17 commercial pilots have graduated from the ranks of the students in the clubs. In 1928 the figures at the end of the year showed 211 private pilots and 28 commercial.

This year there are 22 clubs in actual operation as against 15 last year.

Old Dobbin had one good point. Nobody brought out a new model about the time you got him paid for.

A Reliable Antiseptic—Minard's Liniment.

## From Youth To Old Age

THERE are three trying periods in a woman's life: when the girl matures to womanhood; when a woman gives birth to her first child; when a woman reaches middle age. At these critical times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor. Countless thousands testify to its worth.

## Lydia E. Pinkham's Vegetable Compound

### Artificial Silk From Acetic Acid

**Combined With Cellulose Will Make Fine Fabric Is Predicted**

Prediction that the sour taste in vinegar will be used to make artificial silk was made to the United States Chemical Society today by Professor D. R. Keyes, of the University of Illinois. The sour substance, which is acetic acid, is a touch may make finer dresses was called by Prof. Keyes by its scientific name, acetic acid. His test of a newly-developed process by which for making it, developed in co-operation with E. P. King and Sherlock Swaine, of the university. For making artificial silk it is combined with cellulose to form cellulose acetate.

### World's Grain Show

**National Committee Will Meet In Toronto In November**

Hon. W. R. Motherwell, Minister of Agriculture, is calling a second meeting of the national committee of the world's grain conference and exhibition. The meeting will be held in Toronto on November 21. The consideration of the work has been accomplished in preparing for the world conference which will be held in Regina in 1932. The tentative price lists will soon be ready and will be so arranged that every province will have good chances in some of the classes. As soon as the lists are completed copies of them will be sent to all foreign countries with invitations to compete.

### World Broadcast Trials

The broadcasting of trials in Berlin courtrooms was being contemplated, says a report from the German press. It was declared there were no legal objections to such procedure, since all trials are public, and that if inaugurated it would be a novelty which soon would be copied throughout the world.

## Millions in Waste

Food Plants Save Everything From Discards To Blotting Paper

Some most unusual items that their way into the revenue-producing scrap heaps at the plants of the Ford Motor Company.

Among these items are a carload of blotting paper each week, sale of scrap iron and a huge amount of coke. Sale of scrap of all kinds last year netted the company \$2,572,877.80. This figure represents only scrap that was sold, vast quantities in addition were salvaged and converted into use by the company.

Next to the sale of coke, the largest single item in revenue-producing by-products is scrap metal. Twenty-eight freight cars on an average pull out of the plants each day loaded with metal shavings and trimmings—about 500 tons. More than half of this represents trimmings from machine shops and is sold to outside mills for conversion into new metal.

The rest of the metal scrap is of the type worn out in open hearth furnaces and a considerable volume of such waste never leaves the Ford plant, being converted for further use.

The blotting paper is salvaged after use as a cushion between plates of glass. It is lost only in the value as blotting paper and is resold.

Sliver is recovered from salts used in the photographic department; diamonds are salvaged from hard cutting tools, and not the least are the left-overs from the waste of this latter waste is sold to an optical firm to be made into polishers for eyeglasses.

## Established Penny Post

Sir Rowland Hill Recommended Law

A little over fifty years ago Sir Rowland Hill presented with the freedom of the City of London as a fairly acknowledged of the great service he rendered in the establishment of a penny post. It was in 1837 that Hill published his famous pamphlet recommending that within the United Kingdom the rate for letters not exceeding half an ounce in weight should be one penny. The use of postage-stamps was mentioned almost diffidently, for Hill wrote: "Perhaps the difficulties might be alleviated by using a bit of paper just large enough to bear the stamp, and covered at the back with a glutinous mass which, by attaching moisture, might be attached to the back of the letter." The Act empowering the penny post received the Royal Assent in 1839.

## Marquis Hails Harvesting

Heir Of Duke Of Montrose Spends Summers On Canadian Farm

A scion of a titled house with a liking for work in the fields of the Graham, elder son and heir of the Duke of Montrose, while other young men are sun-bathing at Deauville and on the Lido, he comes to Canada to act as a harvester. This is the second year in succession in which for several weeks Lord Graham has elected to put in work on a Canadian farm. He is a nice-looking fresh-faced man of 22, and good at most games.

Pat. (to tourist).—"We have great athletes in Ireland."

Tourist.—"Why, our champion ran 18 miles and then jumped a nine-bar."

Pat.—"Oh, that's nothing when you think of the run he had to it."

"Dae yeh ken that your hens come over into ma garden?"

"I thought they might be deelin' that."

"Wail mak's ye think aae?"

"Became they never come back."

The average weight of a head of hair is from five to twelve ounces.

Wife: "Please come and help. I can't get the trunk closed alone." Lottie Rucke, Leipzig.

W. N. U. 1805

## Marking Pigs For Identification

The Use Of Metal Tags Is The Most Common Practice

Where hogs are bred in large herds it is necessary to follow some sort of marking for identification. One method which is followed by some is that of nicking the ears, pigs in each litter being marked on a similar part of their ears. By means of various combinations of marks quite a large number of different litters can be marked, and subsequently identified. This method is faulty in that the ears may be torn and the marks destroyed. It has no other weakness in that it does not serve to identify the individual pigs within the litter. The use of metal tags is a general practice on some hog farms. These are stamped with combinations of letters or figures, and as each tag has a different combination a ready means of identification is assured. The most satisfactory type is that which is self-cleaning, and when inserted in the ear remains there permanently unless torn out. When this happens, which is but rarely, a duplicate may be inserted. In order to avoid confusion the tag should be inserted in the ear at or before weaning time. The Dominion Animal Husbandman, who has a wide experience in marking hogs for identification, calls attention in his report for 1928, published in the Bulletin of Agriculture, at Ottawa, to the use of the tattoo in marking swine officially recognized by the National Pig Breeders' Association of Great Britain. This method of marking is undergoing tests at the Experimental Station with a view to determining its value as a means of identifying swine.

## Suggested Economic Parley

Other Dominion Asked Some Time Ago To Meet At Ottawa

Premier McKenzie King has suggested that Canada should meet time ago requested by the other Governments of the British Empire that an economic conference be held at Ottawa this year. It was not an economic conference, however, to arrange for the holding of a conference so soon. In making these statements the Prime Minister pointed out that Canada would welcome an economic conference in the Dominion. "It is exactly what we would wish," said Mr. King. On the other hand, it is not a matter of course to convene the convenience of all parts of the Empire, and if the general feeling were that the conference should be held in London, England, Canada would be prepared to acquiesce. The Prime Minister said that there would probably be an economic conference either here or elsewhere, next year.

## Work Horses Shipped East

Saskatchewan Horses Are Shipped To Lindsay, Ontario

Under the auspices of the Saskatchewan Live Stock Pool, and the Provincial Government, an inaugural shipment of carefully selected work horses was made from Maple Creek this other day to the order received by W. Waldron, Markets Commissioner, from the F. J. Carew Lumber Company, Lindsay, Ontario. These horses are required for bush work and are young, upstanding, heavy weighted teams, and were inspected by Dr. M. P. McCallan, Veterinary Officer of the Provincial Department of Agriculture. A co-operative horse marketing organization for Saskatchewan has been a long felt want and the need has now been supplied by the formation of a horse marketing division of the Saskatchewan Live Stock Pool, supported by the Provincial and Dominion Departments of Agriculture.

## All The Same To Him

His wife had gone to visit her mother, and he telephoned to find something to eat last night, didn't you, dear?"

"Oh, yes," he replied cheerily. "I had the steak that was in the pantry and fried it with some onions that I found in the cellar."

"Cheese!" she gasped. "Darling, you've eaten my flower bulbs!"

The Haberdasher—Yes, sir, those socks will give perfect satisfaction. I've worn them myself for the last two months."

The Customer—Have you a pair like them that you haven't worn so long?"

"Hans, did you hear the step-ladder fall?"

"Yes, mummy."

"The step-ladder hasn't fallen."

"Not yet—it is still hanging by its waistcoat to the picture hook."

## Keep Lonely Vigil

Secretary Of Ancient Cutlers' Company Only Member At Yearly Meeting

Every year on August Bank Holiday (the first Monday in August) the secretary of the Ancient Cutlers' Company, in Hallamshire, keeps a lonely vigil at Cutlers' Hall, where he arranges a meeting for members of the company who he knows will never come, and never have to on this particular date.

An old Act of Parliament, passed as part of a charter of the Cutlers' Company, says that a meeting of the company shall be held on the first Monday in August every year, from the hour of 1 p.m. and 3 p.m., to elect 24 assistants to the company.

In these days no meeting is held, but to comply with the statutory requirements, provision has to be made for a gathering at Cutlers' Hall. The presence of at least 40 members would be necessary if a meeting took place, for this number is needed to form a quorum. If the act of Parliament were to be altered to avoid the necessity of the secretary attending, it would cost about \$4,000 in legal fees and other charges, and so from 3 o'clock to three o'clock, the secretary sits and waits for errand members who are probably enjoying their holidays.

## Menace To Garden Corn

Worm Destroys Kernels When Cob Near Cooking Stage

Since the European corn-borer has been doing damage to corn fields in Canada it has often been confused with another worm, particularly in garden corn, says a Federal Department of Agriculture bulletin. The corn-borer worm, unlike the corn-borer, works in the ear, eating out the kernels of the cob when at the cooking stage. The caterpillar of this worm when mature is from 1 1/2 to 1 3/4 inches in length. It varies in color from light green to dark brown with rather indistinct stripes on the back and a wider and inconspicuous pale colored band along the side. Its description is given in Bulletin No. 112 of the Department of Agriculture, at Ottawa, by Arthur Gibson, the Dominion Entomologist. It is R. Twinn, an officer of the Entomological Branch. It attacks the ears of garden corn, feeding on the kernels, particularly those near the tassels. Some years the insect is quite abundant and according to these authorities, at such times it also may be found boring in the fruit of the tomato.

## A Luxury Already

What with airplanes attaining a speed of 320 miles an hour and automobiles whizzing along at sixty and seventy, motorboats skimming the waves like a flash of light, how long it is going to be before a nice quiet stroll is going to be a luxury?

There is no room for trouble in an air castle.

## Amalgamated Civil Servants

Here Is Fred Knowles, secretary of the Amalgamated Civil Servants

Here is Fred Knowles, secretary of the Amalgamated Civil Servants of Canada. He is one of the organizers of the body and obtained leave of absence from his job as letter carrier in Vancouver to take part in the present job in Ottawa.

## A One-Man Newspaper

"Star" Of "The Star" At White Horse, Yukon, Is Kept Busy

Musolini may hold seven or eight cabinet offices in Italy, but he has more than a rival in J. D. Skinner of White Horse, Yukon Territory. For he is porter, reporter, advertising department, composing room, mailing room, publisher and financier of the White Horse Star. He thinks, he says, that his is the only one-man newspaper published in Canada. There may be others there and elsewhere, but a glance at the issue of July 15 shows a publication free from typographical errors, well edited, and illustrated with various facts in the way and not the least of which is a photograph of Mr. Skinner himself.

The "Star" of the Star, as revealed by his photograph, shows no signs of the wear and tear which might be expected. Yet, in addition to general news, his July 15 edition contains seven or eight columns of "personals," and all country editors know how much work it takes to compile these. All the overworked who may hear of the gallant Mr. Skinner will wish him health and success and look forward to an early day when from the six he gives of his duties, he may be able to strike off the one of averting out the Star office.

## Lightening The Load

If Canada continues as in the past, fiscal year, to devote \$18,382,000 to interest and debt redemption, this country will be free from debt in twenty-two years. Every year the dead weight of interest lightens, having decreased \$23,000,000 since 1921, when the maximum was \$139,531,520 for that year.

The secret of success lies in the man and not in the stuff he works on.

## Glee From Sweet Potatoes

Commercial Production For Use On Stamps To Be Undertaken

A new item looms on the horizon of personal liberty—the privilege of licking stamps that suit the individual taste.

Scientists in the bureau of chemistry and soils have discovered that a high quality starch is obtainable from sweet potatoes. From the starch they have produced dextrin of pleasant taste. They are testing its suitability as glue for stationery and stamps.

All that is left to do is to develop a method of economical commercial production. It is to be undertaken this fall, when the sweet potato crop is harvested. Unofficially, it is believed dextrin can be made from sweet potatoes as cheaply as from tapioca, the present source of most stamp and stationery glue.

If it can, and manufacturers are able to pay enough for sweet potatoes to make it worth the producers' time to market culms, solution has been found for the tremendous waste that has forced many farmers to quit raising them.

It is estimated that about 20 per cent. of the country's average production of 80,000,000 bushels of culms, heretofore suitable only as feed for cattle and hogs.

Six pounds of sweet potatoes, says Dr. W. W. Skinner, assistant chief of the bureau's chemistry and biological research, makes one pound of starch. At that rate he estimates a market for 87,000,000 pounds, or 7,400,000 bushels of sweet potato culms.

## Played Joke On Cambridge

Some Years Ago Students Faked Visit Of Sultan Of Zanzibar

The visit of the Sultan of Zanzibar to Cambridge recently recalled what was probably the greatest hoax perpetrated on any civic authorities. Some years ago it was announced that His Highness would visit Cambridge, and the mayor and corporation turned out in full splendour to pay homage to the distinguished visitor. In due course the Royal party arrived, and were received at the Guildhall. It was not until after the luncheon had been accorded that the councilors learned that they had been entertaining a party of their own students. The undergraduates were on vacation when the Sultan really arrived.

## English Gardeners Value Toods

English gardeners are always in the market for live toads, and not infrequently as much as \$25 per hundred is paid for this insect destroyer. It is estimated that every time a boy kills a toad, he is destroying \$100 worth of stock on a farm.

"Harry, I don't believe that you put cat out."

"Well, if you think I'd tell a lie about a little thing like that, put her out yourself."

## Finishing Poultry For Market

Putting Finishing Touches On Poultry Before Offering For Sale

The time would seem to be past when poultry finished poultry can be marketed with profit. Indeed it is being by authorities that putting the finishing touches on market poultry before offering it for sale, yields the most important returns of any labour done on the poultry farm. Well finished broilers or roasters undoubtedly cost less per pound to the producer than those that are poorly finished, and are much more desirable to the consumer.

The best methods of finishing poultry for market are described by Mr. F. C. Elford, Dominion Husbandman, in Bulletin No. 20, of the Department of Agriculture, at Ottawa. Crate feeding, especially for cockerels, is highly recommended, but it is also fed sparingly for several days. This plan is necessary to avoid indigestion with birds that have been confined in small quarters after having been accustomed to free range. Twenty-four hours of fasting are recommended at this stage. A consistency that it may be poured from the feed into a large water.

In putting in a batch of chickens to be fattened it is recommended to allow them to mink a meal and then to feed sparingly for several days. This plan is necessary to avoid indigestion with birds that have been confined in small quarters after having been accustomed to free range. Twenty-four hours of fasting are recommended at this stage. A consistency that it may be poured from the feed into a large water.

There are many ways of preparing the feed. This bulletin, obtainable from the publications branch, Department of Agriculture, at Ottawa, recommends the use of only ground grain, fed in a wet state of consistency that it may be poured from the feed or dipped out with a flat ladle. Butter milk is recommended as the best liquid with skim milk one feed added. A little salt added to much encourages chickens to eat more of the feed.

There are many ways of preparing the feed. This bulletin, obtainable from the publications branch, Department of Agriculture, at Ottawa, recommends the use of only ground grain, fed in a wet state of consistency that it may be poured from the feed or dipped out with a flat ladle. Butter milk is recommended as the best liquid with skim milk one feed added. A little salt added to much encourages chickens to eat more of the feed.

Instructions for killing and packing for market are included in the bulletin.

## Valuable For Briquettes

Newly Discovered Coal Deposits In Ontario May Be Used For This Purpose

Samples of coal taken from the area at Blacksmith Rapids, Black River, where Ontario engineers have discovered extensive deposits, have been analyzed by the Federal Department of Mines experts, and indications are that the coal is valuable as material for briquettes or powdered coal. Considerable treatment would be necessary before it could be of commercial value. However, the samples which the department examined were taken from seams near the surface, and it is believed a better product might be found at greater depth.

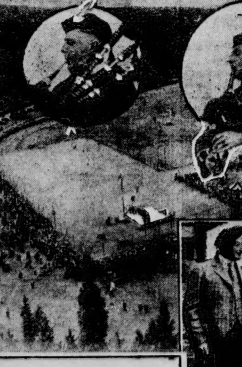

"Most men who reach the top of the tree are lonely," it is stated. They often sacrifice too many friends on the way up.

"What nonsense is this you have written?" "It is this happens again—" "That that is not my writing."

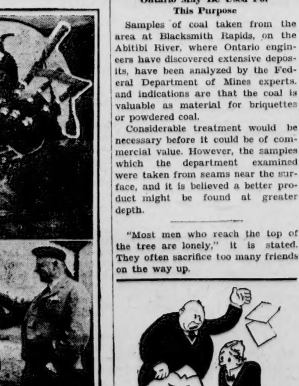

"That is no excuse"—Hummel, Jansburg.

## Where the Clans Gathered

Lay-out of the grounds of the Banff Springs Hotel, where the Banff Highland Gathering and the first Festival and the Dominion Track and Field Championships were staged recently. Centre photograph shows the grounds and (1) Piper Hector McDonald, Montreal winner of first prize for strathpey and reids, second prize for marches and reids, and the highest aggregate points over all in the open piping events; (2) Pipe-Sergeant J. K.

Calma, of Hamilton, winner of the trophy for piping; (3) Pipe-Sergeant Donald McLeod, of the Queen's Own Cameron Highlanders, Winnipeg, winner of the special prize for piping by E. W. Beatty, for the best piping among the delegate pipers from the various Highland regiments of Canada; (4) Lieutenant-Governors Wil-

Ham Egbert, of Alberta, and Randolph Bruce, of British Columbia, at the Festival.

# Mysteries Are Wrapped Up In Strange Disappearances Of Many Deep Sea Vessels

Denmark has abandoned all hope in its long search for a clue to the fate of the full-rigged clipper sailing ship "Copenhagen" with sixty-six crew members, lost for the last time in the throes of her struggle with a heavy sea off a lonely island in the North Atlantic. During the seven months of weary exploration that has intervened, not so much as a spar, a lifeboat or a piece of floating wreckage has rewarded the Danish seamen who undertook the quest for the missing ship. The mystery that envelops the "Copenhagen" closely resembles that attending the disappearance of the United States cutter "Cyprus," and it has prompted the New York Sun to recall other tragedies of the sea that are almost unexplained.

In the latter part of 1925 an American steamer came upon the schooner "Mary Cronin" in mid-Pacific. Nothing indicated that the schooner had suffered from disaster, weather or that it had been wrecked by a high sea. Hoodeaters were found on a newspaper in the cabin, but no evidence of a struggle; there was neither other nor crew, and no boats. The schooner was taken to a newspaper. What had occurred aboard the craft, in all probability, never was known. Two years before this the schooner "Emile Gallien" in rounding Cape Horn, found a three-masted vessel in an iceberg. The craft was firmly fixed in a cleft of the ice mass about twelve feet above the water's edge, and with the exception of a broken telescope, appeared intact. There was no sign of life aboard, and all the boats were in place. He reported the circumstance and the ship was tentatively identified as one long reported missing, but no one was able to offer an explanation of its loss.

A French steamer fell upon a large junk in the China sea, which, upon investigation, the master found that the steamer was a Dutch liner playing among the West Indies and along the South American coast. He boarded a Dutch steamer destitute of life except a starving dog. He found evidence that the crew had been swept away by a strong current. The steamer had been listed among missing ships, but in this case, too, only conjecture was left regarding the fate of its crew.

Not always does Old Man Sea leave so much of a clue to his mysteries. It is because he restored missing ships to human ken that another chapter could be written of their disappearance.

**A Strange Coincidence**  
Peter Archer, a six-year-old boy, of Hull, England, who was knocked down by a motor omnibus and seriously injured, was being taken in an automobile to Hull Royal Infirmary, when the ambulance was stopped for a man who had been injured at work. He proved to be the injured boy's father.

Mrs. Brown eyed the girl judicially.  
"Tell your master," she said to the butler's boy, "that I shall buy my man wherever it is, but I don't correct the error of his weight."

"Have you ever heard of mountain that fall?"  
"No, and don't expect I ever shall."—Lustige Sacher, Leipzig.

W. N. U. 1805

## Canada's Dairy Industry

Canadians Are Eating More Butter Than Ever Before

Dairying is a rather flourishing business in Canada right now. Canadians are eating more butter than ever before. We are large consumers of this product. In 1925 we consumed 29.31 pounds per capita in this country as against about 18 pounds per capita in the United States. This is accounted for partly by the elimination of oleo-margarine from our market, although it is sold in the States. Also our butter is a better butter and induces a liberal use.

The only real competition our dairymen face is in New Zealand, where butter, which is imported during the winter months, in small but increasing quantities. Canadian producers find that their storage product must compete against the fresh New Zealand product and the competition is difficult. But the effect of the importations has been exaggerated.

In these, Canada is building up a commanding position throughout the world. This is due chiefly to the fact that Canadian Chester Cheese is of high quality and sells at a premium in the markets over other imported cheese. This fact was referred to in a recent article in the Canadian Business Review, published by Cecilfield, Brown & Co., Ltd., a merchandising agency of Montreal.

The article was written by the Rev. Duncan Marshall, former minister of agriculture in Alberta, who is now a member of their staff. There is a lesson in our experience with cheese, in the fact that by grading properly and by establishing good marketing facilities we have put our cheese beyond the range of competition. Given proper leadership by Dominion and provincial departments of agriculture, our butter producers could do the same thing.

The greatest danger in the dairy business at the present time is with rather than outside of the industry. It lies in the fact that the demand for cows is so great that many men are tempted to break up their foundation herds when they should be building them up.—Financial Post.

## To Exterminating Insects

**Electric Light Rays Are Now Used With Good Effect**  
Light rays and electricity are being used in exterminating insect pests. Electric light traps, consisting of a lamp set directly over a pan of water upon which a covering of oil has been poured, causes the insects who invariably fall into the film of oil and is unable to arise.

An electrified screen stable door has proved feasible. The screen is charged with high voltage static electricity to pests but harmless to humans.

**Boy Friend (calling Rancee):**  
Hello, dear, would you like to have dinner with me tonight?  
He: "I'd love to."  
She: "Well, tell your mother I'll be over early."

The future can be seen with a great light, when the chick, or the hen, will pick at objects so small that the human eye misses them.

## President Inspects Resort

Among the many places visited by E. W. Beatty, chairman and president of the Canadian Pacific Railway, and the directors who are now on a hunting resort at Nipigon, in the west, was the famous fishing and hunting resort of Nipigon. Mr. Beatty is seen accepting a bouquet of Nipigon Chrysanthemums from Miss Jean Porter, daughter of the operator at Nipigon Depot, and is also shown conversing with Tom Running Deer, Indian guide attached to the camp. The president and directors spent several hours in the camp on their way to the west.

## Held Important Military Posts

Brig.-Gen. Sir Gilbert Clayton, high commissioner for Iraq, who is to lead after colluding following a polo game, Sir Gilbert was 54 years of age, and had held several important military posts.

## Rambouillet Sheep

**Considered To Be the Best Breed For the Beginner To Raise**  
Although not well known in the province of Manitoba, the Rambouillet breed of sheep enjoys a wider reputation than almost any other breed. They possess some very desirable characteristics, in that they are unusually hardy, and free from many diseases that affect sheep. They have an excellent quality of wool, the ewes make excellent mothers, and through a foundation of Rambouillet, a high class flock of any of the blackface breeds may be quickly developed by the farmer who pays careful attention to his breeding practices. There is no doubt but that the Rambouillet breed is the best for the beginner in sheep, owing to the fact that generations of breeding on the large ranges, has developed in this breed, a remarkable ability to take care of themselves under any conditions. The sheep that are being supplied to Manitoba farmers by the Manitoba Livestock Credit Company, this fall, are carefully selected lot of the Rambouillet breed.

## Merely An Uncle

Lord Macduff, the young son of Prince and Princess Arthur, of Connaught, had just learned the words of the national anthem, and he told his nurse that he wanted to see "Our King."  
One day, when the King was walking in the grounds at Baginbun with the Duke of Connaught, Lord Macduff was told by his nurse, "Look, there is the King, with Grandfather."

"Oh, no," said little Lord Macduff, "that is not the King. That is my Uncle George."

The only place a woman cannot attain her point is on a lead pencil.

The French perfumery industry is valued at \$35,000,000 a year.

# Daily News Bulletin Service To Be Supplied Residents Of Far North By Edmonton Station

## West Going Ahead

Sir Henry Thornton Takes Note Of Developments On Trip To Western Canada

"There is a silver lining to the cloud insofar as the situation in Western Canada is concerned," stated Sir Henry Thornton, chairman and president of the Canadian National Railways, on returning to his headquarters in Montreal, after a tour which took him throughout the Western Provinces and to the Pacific Coast.

"While it is true that the West is not harvesting such a voluminous crop as in average years, and it is also true that some farmers and some districts are hard hit, it must be remembered that there are districts where farmers in these districts who have harvested better crops than they anticipated a short time ago, and who are reaping the benefit of higher prices from their better over grain from last year, and also higher prices for the grain which they have produced in 1925."

The West has gone ahead and is going ahead; building up on a basis of sound progress, and one going from the East cannot fail to be impressed with the same developments which is taking place on all sides.

On the Pacific Coast, in particular, the development of trade with the Orient is being closely followed, and there is also a realization of the fact that Canada is sharing and will share to a greater degree in the further development of that trade. Sir Henry, concluding with the statement that he had inspected the properties of the system in each of the provinces visited and he had found them in good condition everywhere, the officers and employees kept on the alert to provide the best service to its patrons.

## Russian Farm Uses

**Machinery Exclusively**  
Soviet Grain Tractor Cultivated 350,000 Acres Of Land This Year

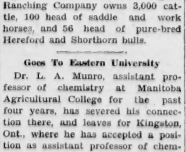

M. Kalmayev, head of the Soviet Grain Trust, when in New York recently, stated that the Grain Trust owned 350,000 acres of land this year. It was formed last year to organize and operate large grain farms entirely by machinery. The Grain Trust in the Northern Caucasus, has a cultivated area of 120,000 acres. The sowing period of this farm lasted only 9 days, 600 tractors being involved. This is the world's largest farm using machinery exclusively. The Soviet Government has allotted 4,000,000 acres of land to the Grain Trust this year. Out of this total 2,250,000 acres will be sown next winter and spring. The plans for 1931 call for the cultivation of nearly 6,000,000 acres out of the Grain Trust's 10,000,000 acres that the Grain Trust will have under its control in that year. The Soviet Government has a machinery and tractor service in Southern Siberia, which operates fleets of tractors to cultivate peasant land. The stations of the State Machinery and Tractor Service, which are expected to plough nearly 2,500,000 acres next year, will receive in payment for their services a part of the crop ploughed.

## Large Ranch Authorized

**Southern Alberta, Canada Is Holding 99,881 Acres In Lease**  
The days of vast ranches have not altogether passed from the prairies. The Canadian Gazette recently authorized the Pigeon Ranching Company, which operates south of Medicine Hat, in Southern Alberta, to hold 99,881 acres in lease in spite of the official regulations which limit holdings to 25,000 acres. The Pigeon Ranching Company owns 3,000 cattle, 100 head of saddle and work horses, and 56 head of pure-bred Hereford and Shorthorn bulls.

Whether an individual who owns a piece of property also owns the air above it, and whether he may sell or lease the air, is a disputed legal matter.

Sugar is found in the sap of nearly 200 plants and trees.

**Goes To Western University**  
Dr. L. A. Munro, assistant professor of chemistry at Manitoba Agricultural College for the past four years, has severed his connection there, and leaves for Kingston, Ont., where he has accepted a position as assistant professor of chemistry at Queen's University. Dr. Munro took his Bachelor's and Master's at Arts at Dalhousie, and his Ph.D. from McGill, and joins Queen's with the best of academic and practical training.

Some pounds weigh as much as 80 pounds.

## Residents of Aklavik and other points inside and outside the Arctic circle in the far north are to be given a daily news bulletin through the use of a wireless news service which will do much to improve the isolation of these pioneering men and women—traders, ranchers, trappers, prospectors, missionaries, doctors, teachers and members of the Royal Canadian Mounted Police who are carrying civilization into the far north.

For the past few years the residents of the Maclean District have had the benefit of the wireless service for telegraphic purposes. Stations at Fort Smith, Resolution and Simpson, in the valley, and Aklavik and Herschel on the Arctic coast, have been linked up in this manner with the nearest station at Edmonton, but only commercial and urgent private messages have been handled.

However, Mr. Stewart felt that something more could be done with the equipment, and he has now, in co-operation with the department of the Interior, made arrangements whereby every day one of the officers of the Department of the Interior, at Edmonton, prepares a 100-word news bulletin, and the same is sent to the receiving stations of the north.

The bulletins thus received are posted at the local offices of the North West Territories and Yukon branch, and at all post offices where they are obtainable, and where they can be read without charge by the residents of the various settlements.

The work has been placed in the hands of assistant commissioner of Dominion lands, R. B. Matheson, at Edmonton, and the first 500-word bulletin has been sent. The news bulletin will be continued without interruption as far as possible, and according to northern news in the city will prove of inestimable benefit to people living in the outlying areas who will thus be kept in touch with world events and Canadian happenings of particular interest to them.

## Describing a Canadian

**Immigration Act Leaves No Room For Argument**

From time to time the question is asked, "What is a Canadian?" It is likely this will be done in the next census two years hence. As a matter of fact, a Canadian is clearly described in the Immigration Act as follows:  
"(1) A person born in Canada who has not become an alien; (2) a British subject, who has Canadian domicile; or (3) a person naturalized under the laws of Canada, who has not subsequently become an alien or a Canadian domiciled in this country."  
This would appear to meet the case adequately.

## Investigate Movie Industry

Professor Kenneth W. Taylor, of the economics department of McMaster University, has been appointed, by Hon. Peter Homan, minister of labor, to assist in the preliminary inquiry, under the Dominion Comptroller Investigation Act, into the alleged combine in the motion picture industry in Canada, it was announced by the Department of Labor.

Whether an individual who owns a piece of property also owns the air above it, and whether he may sell or lease the air, is a disputed legal matter.

Sugar is found in the sap of nearly 200 plants and trees.

"You are lucky in love, Mr. Du point?"  
"Excessively—I am still a lach elor."—Montquie, Charleroi.

## To Assist Farmers

**Saskatchewan Farmers In Dried Out Areas May Import Fodder Free Of Transportation Costs**

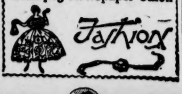

Farmers in the drought-affected areas of Saskatchewan, forced by circumstances to import fodder for their live stock, will be able to do so free of all transportation costs, according to an agreement between the Government of Saskatchewan and the one hand, and the two railway companies on the other. Freight charges on fodder supplies into, and on laying out, from the dried out districts will be borne jointly by the government and the railway companies. Under the arrangement, the provincial government undertakes to pay the freight charges which the railway companies undertake to reduce 50 per cent, according to Frank W. Thompson, chairman of the Canadian Freight Association.

## New Varieties Of Rust-Resisting Wheat

**But Production Not Yet Sufficient For Seed Distribution**

Two or three varieties of wheat which will resist rust have been developed by the Department of Agriculture, it was stated by Dr. J. H. Grisdale, Deputy Minister of the department. "Our experiments this year confirm the earlier promises," said Dr. Grisdale. "No names have yet been given the new varieties, and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we will have the kind that will resist the known varieties of rust."

## The Singing Fool

By HUBERT DAIL  
Copyright, 1928, Warner Bros.  
Pictures, Inc.

### SYNOPSIS

Al Sitone, singing waiter at Blackie Joe's New York night club wins fame on Broadway as a composer of popular songs. He marries Winton, a ballet singer, and makes her famous, too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes romantically interested in John Perry, Al's close friend, and Perry goes her to the moon. Al On the third anniversary of his marriage Al takes Molly home from the Club Bongo, where he is part owner. She is moody; her conscience bothers her because of her behaviour with Perry. This is in the morning and she goes to the nursery. Later, in a burst of rage, she tells Al she doesn't love him any more. As Al recoils, Molly hears Junior calling her.

### CHAPTER XV

Molly had awakened to find that his toy, his woolly bear had dropped out of bed. So he was calling to Molly to come and get it for him. Her high child drifted through the rooms to Molly and Al they gave a start. The expression on Al's face softened in an instant. Molly remained the same as she brushed by Al to look after Junior. Al turned, looking after her retreating figure, still in a daze from her harsh words. He had lost her love, she actually said to herself. Her words and the heart-breaking scene he had just passed through seemed fantastic and unreal to him. What had he done to deserve her indifference and lovelessness?

Then, like a man in a dream, he followed her toward the nursery. Standing in the doorway, he saw her pick up Junior's woolly bear from the floor, replace it in the child's arms and carefully tuck him in.

"Go to sleep, now, Junior. Then Mamma can sleep too."

How strangely contrasting was that soothing voice to the tone Molly had just used in addressing Al. And how kind the expression on Molly's profile as she bent over Junior's bed! Surely this was not the end, thought Al. He suddenly determined that he would not let their life together be blasted by her whim; he would fight to reawaken Molly's love!

As Molly came toward him he raised his hand with an apologetic gesture. "Darling, don't we talk that way?" If I've done anything tell me!"

"No—no more talk!" Molly panted, his entering her bedroom. He heard her door close with a snap of finality.

But now Junior was sitting up, holding out his arms to his father. "Daddy, please sing me to sleep."

Al came forward swiftly, picking up Junior, holding him close as if to drive away the wound Molly had inflicted. There, at any rate, was someone who loved him, trusted him, and always regarded him with the same adoring, happy smile. For a moment Al choked up and couldn't speak. Then he said huskily,

"What do you want me to sing, baby?"

"You know," whispered Junior confidently, "that one about a little boy like me."

"Little Feller?"

"Yes, that one."

Slowly Al began to sing, rocking Junior gently to and fro. There was an audience of one to hear—and that a very sleepy audience. Al's words had not been matched since that night three years ago when he had sung the love ballad "Always" to touch Molly's heart. As the song continued Junior's head drooped in drowsiness and presently his eyes closed. When Al knew that he was really asleep the rhythmic words trailed off into a whisper and silence. Then, pressing the little form close to him for a last good-night hug, he put his son back in the bed.

Once more the ly-toe-tong from the room. Then Al stopped and gazed wonderingly at Molly's closed door. She was still up, in the semi-darkness of the hallway he could see a dim, narrow line of light under it.

Perhaps she was already replying of her quiet, unkind words—

that could be true! Her pride would not let her make up to him now, but, perhaps in the morning.

Until the long black hours of the night faded into the gray dawn Al sat up in bed, gazing out over the lights of the city, smoking one cigarette after another, wondering, planning.

In the morning Molly's manner was still cold, but her whip-lash tongue was silent. She avoided meeting his eyes and when she spoke it was about necessary things concerning Junior or the household. Al watched her to detect the slightest softening glint in those jet blue eyes, but there was no sign of relenting. Finally he left the apartment for his work.

All through the day and evening there was an actual sharp pain in Al's heart as if a knife had been driven swiftly into him and withdrawn. But he went about his work the same as usual, trying to forget the scene of the night before.

When he saw Molly after her performance that evening he thought for the first time since the day she was not cordial, by any means, but she made some attempt to treat him courteously. His heart gave a bound; the life together would not be smashed, after all.

So the days passed, with Molly avoiding Al most of the time, and maintaining a certain secrecy of manner when she did talk to him. Then New Year's Eve arrived, and New Year's Eve that Al was to remember always.

It was the big night in the city's life of revelry; snow blanketed the streets, embellishing the roofs and facades of the houses and skyscrapers, emphasizing the dazzling splendor of brilliant cars.

At the Club Bongo the noise of "whoopie" had its most devoted adherents. The crowd in evening dress wore tiny carnival hats and danced

with the true spirit of abandon as midnight approached. Long streams of confetti in brilliant red, green, blue, yellow and purple were shot across the room, describing graceful curves before they fell across the dining tables and the shoulders of the dancers. It was the biggest crowd the Bongo had ever entertained and on the raised orchestra platform stood Al, wearing a fascinating head-piece, a megaphone in his hands. He was leading the merriment, but the ache in his heart was still present.

Perhaps, he thought, the unrestrained gaiety of this night would change Molly's mood so she would become her old, friendly self. He gave a hurried glance toward her reserved table; she should be here by now. Then came the distracting business of introducing the celebrities, and once more he glanced at the vacant table and consulted his watch. Molly was at least a half hour late. He nodded toward the orchestra leader, signalling for another dance.

As the dancers swept toward the floor he retreated among the tables. What was keeping Molly? He could hear the shrieks of the New Year had arrived, the time when friends and misunderstandings are forgotten, new resolutions are made, and life begins anew. All this, he hoped, would change Molly's mood.

The orchestra was playing with staccato briskness and abandoned, the couples swayed and swung and glided to one another.

"Choose a partner yourself!" cried a friend in passing, clapping Al on the shoulder. Al hesitated in answer, but a moment later he turned toward the "phone room" at the rear. Perhaps Molly had gone straight home from the theatre—he must find out!

The "phone room" was a sort of alcove, with three or four booths. Al entered one, pulling the door shut and calling his apartment number. But the door suddenly drifted open, revealing the head of a woman. He entered. Just then he heard a feminine voice at the other end of the wire sotto voce, he thought. He quickly pulled the door shut again and said:

"Molly, dearest, I've been holding your table for you—hoping you come."

But again the door flew open and he missed the answer. (To Be Continued.)

### Intends To Collect Pay

Circus Water Carrier Inherits Fortune But Wants His Wages

A 21-year-old, 180-pound, 6-foot-tall carrier for a circus playing in Portland, remained at his post under the white top and refused to leave to collect a \$275.00 inheritance available in Los Angeles, because, he declared, the circus owes him \$60 "bald" money, which he won't get if he leaves.

The youth, Robert Sterling, of Philadelphia, said he would remain with the circus until he reached Los Angeles, where he would answer personally the telegram received from an attorney informing him of the inheritance. He told himself, Sterling said when the Radio Corporation of America was organized headquarters for a radio show in Philadelphia and purchased a few shares of stock in the corporation.

When the elder Sterling died in 1927, Robert said, he left the circus keeping of a Los Angeles attorney until Robert became a age. Young Sterling became 21 years old on July 20, but he said he was "busy" filling the cook house ice tanks with water," that he paid little attention to the attorney's notes.

To have the children send and have it all the time, he said. They cannot be healthy if troubled with worms. Use Mother Graves Worm Exterminator.

### Paris Is Particular

Unaccompanied Women Are Refused Service In Many Cafes

Numerous cafes in Paris still refuse to serve unaccompanied women and the newspapers have taken up the question of the removal of the ban. They argue that times have changed and that women should be catered to even when alone. The fact seems surprising from a New World point of view. On this side of the water nowadays women go accompanied to theatres, cafes, hotels and all other public places, and the fact of their being alone is unimportant.

### Applies To Every Nation

If China and Russia should go to win fifty-five per cent. of the population of either country wouldn't know what to do with it. It is pretty nearly the case with a war in any nation.

### Says Vancouver Best Outlet

Nothing In Way Of Branch Lines For Peace River District

Dechard Beatty  
"When rail connection is established between the Peace River District and the Pacific coast, it would appear that Vancouver would be the logical point for the outlet on the coast," declared H. W. Beatty, president of the Canadian Pacific Railway, who returned to Vancouver Wednesday from Victoria.

Mr. Beatty was non-committal as to when and how rail connection between the coast and the Peace River area should be made. He suggested that coast connection would be the natural consequence of developments in the Peace area, and indicated that it might not be advisable to undertake the great long haul until the period had arrived when no mistake could be made.

Regarding the Pacific Great Eastern Railway situation, Mr. Beatty said that it would be time enough to discuss that matter when the survey now under way by the provincial government, the Canadian Pacific and the Canadian National has been completed, and that the directors of this road, jointly owned by the Canadian Pacific and the Canadian National will likely have some announcement to make at the end of the year.

Answering a direct question as to the way of breaking the rail road long haul into British Columbia block of the Peace River area in order to give a farm near located from 40 to 100 miles from the railroad at Hyatt, he said that he saw no reason why it could not be done.

## THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-fading source of joy, but, at the same time a never-fading responsibility to the fond mother. It is not infrequently happens that minor ailments in the child demand the attention of the mother. She does not know just what to do, yet feels that she must consult the doctor. At just such times as these, the mother should turn to Baby's Own Tablets as the mothers' greatest help.

Most childhood ailments arise in the digestive tract—the bowels are clogged and the stomach sour. Baby's Own Tablets are a never-failing remedy for this condition. They are mild, but thorough laxative, clearing the bowels, breaking up the stomach and bowels they banish constipation and indigestion, break up colds and simple fever, allay the pain attending the cutting of teeth and promote healthy living.

Think no lightly of them that I would not be without them. Please send for a little booklet on the care of children.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Proposed Fish Cannery For Manitoba  
According to the "Canadian Freeman," a fish cannery is being proposed to pack fish products of the Manitoba lakes. It is also reported that the cannery is to be located in the large available quantity of coarse fish and fish oil from the Manitoba fisheries and stock feed manufacture.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

### Works Both Ways

You will find, young man, that as long as you have to work for a living there will be something about the job you are on, or somebody working with you, that you don't like. Forget it and look to the future, and the fellow may feel the same about you.

Minard's Liniment for Warts.

England has had only one king who grew to manhood and who never married. He was William Rufus, or William II, son and successor of William the Conqueror.

## Real Dyes are easier to use

**DIAMOND DYES** are used by practically the same number of other dyes. They are easy to use, though more smoothly and evenly, without spotting or streaking, because they are made from real materials, without a trace of filler or injurious fabrics or give things that dyed colors.

Diamond Dyes contain the highest quality material that money can buy. That's why they give such clear, bright, new-looking colors, which keep their depth and brilliance so remarkably through wear and washings.

Next time you have dying to do, try Diamond Dyes—at our risk. See they are easier to use. Then they are easier to use. You will surely agree.

Next time you have dying to do, try Diamond Dyes—at our risk. See they are easier to use. Then they are easier to use. You will surely agree.

Next time you have dying to do, try Diamond Dyes—at our risk. See they are easier to use. Then they are easier to use. You will surely agree.

Next time you have dying to do, try Diamond Dyes—at our risk. See they are easier to use. Then they are easier to use. You will surely agree.

Next time you have dying to do, try Diamond Dyes—at our risk. See they are easier to use. Then they are easier to use. You will surely agree.

## The Oyen News

### About Town and Country

Alex. R. McTavish, Graduate Sight Specialist, will make his regular monthly visit to the Hotel in Oyen, Thursday October 10. Dependable eye-sight service at reasonable prices.

Mr. Thos. Lees and Mr. James Lees left this morning on a business trip to Calgary.

Mr. Russell Taggart, formerly of this district, now of Walden, N.Y., who has been visiting friends here for the last three weeks, is leaving to-night for Banff, where he will spend a few days before returning to his home in Walden.

Mrs. Margaret Macgregor, a director of the Fuego Oil Co. is expected to arrive in Oyen on Friday to attend meeting of the directors of the Fuego Oil Co. Ltd.

See my double page adv. in this issue of the News.—J. B. Lowe.

Mr. T. H. Green, popularly known as "Slim", is leaving in the morning for his home near Melfort, Sask.

Mr. and Mrs. Otis Golden and family, left Tuesday morning en route to York, Penn., where they will spend the winter months. They will be accompanied by Art Lofquist, as far as Fargo, N.D.

The Women's Guild will hold a Birthday Tea at the home of Mrs. H. R. Chapin, on Wednesday, October 9, from 3 o'clock till 5.30 p.m. Everybody is cordially invited.

On Wednesday next  
At the home of three  
The Guild will hold  
A Birthday Tea  
As the years of your age  
Will be your foe  
The older you are  
The better 'twill be.

Mr. and Mrs. J. J. Skinner, motored to Calgary the fore part of this week.

Mr. A. E. Andrew and Miss Norma Andrew of Hamilton, Man., were visitors at the home of Mr. and Mrs. C. G. Peterson, last week.

Mr. Jack McKenzie who left last week with a carload of cattle for the Winnipeg market, is expected home to-morrow.

Mr. and Mrs. E. H. Brower of Toronto, arrived in Oyen last Friday and are guests at the Alberta Hotel.

Dr. Harold Miner of Milwaukee, one of the directors of the Fuego Oil Co. arrived in Oyen last Saturday.

Mr. George Wilcox, a director of the Fuego Oil Co. Ltd., arrived in Oyen last Monday from Toronto.

The next three bookings at Oyen Theatre will provide excellent entertainment for its patrons.

### New Strike at Fuego

Drilling operations at the Fuego well were re-commenced last Thursday and late on Sunday night a heavy flow of oil was struck, which on Monday morning was estimated at between 75 and 100 barrels. The new strike is reported to have the appearance of good crude. Following this further showings of drilling operations have been temporarily suspended until the casing has been cemented in.

The directors of the company who were in Oyen, held a meeting on Monday afternoon, the meeting being adjourned till Friday of this week.

Mr. E. G. Law, president of the company, Mr. A. O. MacArthur and Mr. Brower, left last Monday evening on a business trip to Calgary and later will pay a visit to the Turner Valley field before returning to Oyen, later in the week.

The community of globe trotters who made a circuit of the globe during the winter about the Canadian Pacific liner Empress of Australia contributed a series of remarkable items to the social notes of a Japanese passenger when their vessel terminated her voyage there. An engagement, a marriage, and the birth of five children to a Japanese commander of the cruise ship, something hitherto unrecorded in sailing annals. The five Japanese babies were affectionately named the "Empress of Australia," "Empress of Scotland," "Empress of France," "Empress of Canada," and "Empress of Russia," after the giants of the Canadian Pacific fleet. The babies were canaries.

D. C. Coleman, vice-president of western lines of the Canadian Pacific Railway, has been elected a director of the Metropolitan Life Insurance Company of New York. The only other Canadian director is Hon. L. A. Tachereau, Premier of the Province of Quebec.

A tunnel built at a cost of \$250,000 makes it now possible for trains from North Vancouver to connect with the Canadian Pacific Transcontinental system. The first train making use of the new connecting link that also makes use of the second narrow bridge and the harbour rail system, carried the Governor-General and many distinguished westerners.

Funerals and weddings can hold no terrors for Captain Frank Middleton, of the Canadian Pacific ship "Alberia," who has been presented with no less than three top hats. As captain in charge of the vessel entering the port of St. Louis, Mo. for the first time this season, Captain Middleton at each point he was given the traditional welcome address and presented with a silk hat on each occasion. His three shining toppers reside in a neat row in his cabin and it is estimated that it will take three hundred years to wear them all out.

### Notice to Threshers

Owners or operators of threshing machines and combined harvesters are required to have their machines registered with the Department of Agriculture and to send the Department at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether the machine is to be used for custom work or only for owner's crop.

Special forms for these returns may be secured from the PUBLICITY BRANCH, Department of Agriculture, Edmonton.

### Artists in British-Canadian Concerts

Florence Hood

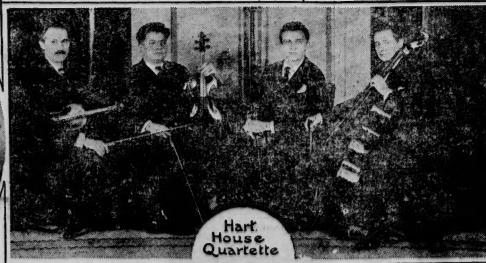

Mary Frances James

Stanley Maxted

Rudolph Plamondon

Hart House Quartette

Brilliant entertainers are to be heard this fall and winter in a nationwide chain of musical centres throughout the Dominion, sponsored by the Canadian Pacific Railway. They will appear in a series of six concerts, the outgrowth of the Music Festival, now internationally known, which have been staged by the Music Department of the railway. Each of these concerts will be given at Toronto, Winnipeg,

Regina, Calgary, Vancouver and Victoria with a probability of other cities being added to the list. Among those now taking part in these concerts will be Florence Hood, brilliant Canadian violinist; Mary Frances James, lyric soprano of Montreal; Stanley Maxted, Montreal tenor; Rudolph Plamondon, Canadian-born star of the Paris Opera; and the Hart House Quartette, internationally famous as players of Chamber Music.
